

Restoring Community Access – Accessibility Ramp Remediation

The Impact Center at CFBC – San Antonio, TX

PROJECT / SERVICES:

Project Management
Site Logistics
Safety Compliance
Quality Control
Stair Demolition
ADA Ramp & 5'x5' Landing

The Challenge & The Solution

The original narrow wooden stairs at the Christian Family Baptist Church (CFBC) Impact Center posed a severe safety hazard and structural barrier, preventing elderly, disabled, and veteran clients utilizing motorized scooters from entering the facility safely. Led by 20-year Air Force veteran Pastor Rob Johnson, this vital community anchor serves 400–500 local families and distributes 20,000 lbs of food monthly to vulnerable populations.

To eliminate this barrier, HeroMount Solutions partnered with SA Construct to remove the unsafe stairs and build a robust, ADA-compliant ramp paired with a 5' x 5' landing platform matched to the entryway awning. HeroMount managed project oversight, logistics, and compliance, while SA Construct delivered professional trade craftsmanship. The smooth execution restored dignified, unimpeded access for all community members visiting the center.

PARTNER COLLABORATION: SA Construct

PROJECT DATES: June 2026

REACH / IMPACT: 400–500 Monthly Served
20k lbs Food Distributed

REINVESTED: \$9,500
